

Alberto Gálvez Aguado

Full Stack Developer · Junior

Granada, Spain | (+34) 615 914 882 | albertogalvezde0@gmail.com

LinkedIn: linkedin.com/in/alberto-galvez-aguado | GitHub: github.com/albertogalvez-dev | Portfolio: albertogalvez-dev.github.io

SUMMARY

Full-stack developer, from back-end and APIs to the front end. Two award-winning projects and prior experience in operations and logistics (ERP/WMS, team coordination), which I use to build clear, measurable and maintainable web tools designed around the real process of the people who use them.

FEATURED PROJECTS

Convive — Communication and case-management platform for schools

Solo project · Open source · Winner of the Aircury Summer of Code grant (€3,000) · conviveaula.com

- Open-source platform for secure communication and internal case management in educational institutions.
- End-to-end design: REST API with an OpenAPI contract, migrations, automated tests and continuous integration.
- Stack: Angular, TypeScript, Symfony, PHP, PostgreSQL, Docker, OpenAPI, GitHub Actions.

Echo2Action — Generative AI that turns reviews into actions

Team project (2 people) · Winner of SIDN Gen AI Arena

- Turns public reviews of physical stores into prioritized problems and concrete actions for marketing, customer support and operations.
- Next.js/React dashboard with a FastAPI backend; sentiment and severity classification and impact prioritization.
- Stack: Next.js, React, TypeScript, FastAPI, Python, Vertex AI, Gemini, BigQuery, Docker.

Guías Caninas — Dog-care editorial platform

Solo project · In production · guiascaninas.com

- Editorial platform in production with a headless CMS, in-house tools and a pipeline that requires sources and traceability before publishing.
- Stack: Astro, Payload CMS, TypeScript, PostgreSQL, Docker, Cloudflare.

Servicios GRX — Curated local-services directory

Solo project · In production · serviciosgrx.com

- Directory of verified professionals in Granada: 76 professionals, 12 categories and 11 editorial guides.
- Content architecture, professional profiles, internal search, onboarding funnel and local SEO strategy.
- Stack: WordPress, PHP, MySQL, custom theme.

PROFESSIONAL EXPERIENCE

Sempatiza — Web Development & SEO

April 2026 – August 2026 · Granada, Spain

- Development, layout and migration of live production websites with WordPress and Gutenberg.
- Performance and Core Web Vitals optimization, on-page technical SEO and issue resolution.

Silicoderm Cosmetics — Logistics & Operations Supervisor

May 2024 – December 2025 · Granada, Spain

- Day-to-day ERP/WMS management, stock control and traceability in a high-demand environment.
- Incident resolution and escalation, workflow improvements and decision-support reporting.

Telepizza — Store Management and Operations

August 2021 – August 2025 · Granada, Spain

- Progressed to leading an 11-person team with full operational responsibility for the shift.
- Demand planning, quality control, onboarding of new hires and customer service.

A Forged Tool — Warehouse Operator

August 2020 – April 2024 · Granada, Spain

- Inventory, order picking and warehouse-flow control in an industrial setting.

- Use of ERP systems and handheld (PDA) devices; goods receiving, checking and dispatch.

EDUCATION

Multi-platform & Web Application Development (DAM + DAW)

Instituto FOC · 2025 – 2027 (ongoing)

Business Administration + Law

University of Granada · 2017 – 2021 (4 years completed)

Baccalaureate — Social Sciences

IES Manuel de Falla · 2015 – 2017

CERTIFICATIONS

- AWS Certified Cloud Practitioner · 2026
- Linux Essentials — Linux Professional Institute (LPI) · 2026

TECHNICAL SKILLS

Backend & data: Java, Spring Boot, PHP, Symfony, Python, FastAPI, PostgreSQL, MySQL, Redis

Frontend & web: TypeScript, Angular, React, Next.js, Astro, Tailwind CSS

Product & delivery: Docker, GitHub Actions, OpenAPI, WordPress, Cloudflare

TRANSFERABLE SKILLS

- Translating operational needs into clear, prioritized requirements.
- Reading real processes (ERP/WMS, ticketing) and proposing data-backed improvements.
- End-to-end ownership: from problem to deployment.
- Documentation and traceability of decisions and incidents.

LANGUAGES

- Spanish — native
- English — working proficiency (B1), fluent technical reading
